

G.S. Grinding Services

Job Responsibilities

3/3/2026

- Pre-Job:
 - Mill: check motor and hydraulic oil levels; fill fuel and water; perform drum maintenance, etc. on Mill; ready to drop in ground by truck start time
 - Skid Loaders unloaded, fueled, greased ... ready to go when mill hits the ground
 - Laborers mark utilities
- During operation:
 - perform needed mill maintenance while filling mill with water
 - Check the drum
 - Change teeth that are worn (NOT THOSE THAT ARE NOT)
 - Check holders, verify they are tight
 - Check conveyor belts for tightness and tracking
 - Check Water System – make sure “ALL” spray nozzles working properly
 - Equipment Breakdown ... First, Notify Supervisor. Supervisor responsible for next action
 - Finish milling as efficiently as possible
 - Minimizes “other” direct cost (labor is a constant for jobs lasting less than 8 hours)
- Post-Job:
 - Wash down mill
 - Grease “ALL” fittings requiring daily lubrication (60+ fittings)
 - Check the drum; perform any maintenance required
 - Assist clean-up operation if needed
